

Fall

Because of YOU we have beat the odds and have stayed in business 10 years!
THANK YOU for helping us in our
"Relentless Pursuit of Perfection"

First Blue Ribbon Trailer ~ 1998

Featured Customer

Nampa Christian High School

We have been fortunate to manage the landscape for Nampa Christian High School, Middle School and Elementary school over the past five years. This year, Nampa Christian Schools accepted our proposal for landscaping their new high school.

We installed an underground irrigation system around the school building, fine graded and drill seeded 3 1/2 acres of turf. This project consisted of approximately 15,000 lineal feet of pipe, 372 sprinkler heads and 24 valves. We donated a portion of our work to the project.

Compost West donated over 100 yards of compost for the soil amendment. **Petra Earthworks** donated time and equipment by moving over 500 yards of top soil. **Town & Country Electric, Inc.** donated various electrical services for the underground irrigation system.

It was a pleasure working at the school for the summer. Please come by and see our work as the grass should be growing in the next couple of weeks. More photos of this project are on our website!

NEW!

The sprinkler blowout schedule will be posted on our website very soon.

UPCOMING SERVICES

October
Sprinkler Winterization

November
Round 5 Fertilizer Application
Deep Root Injection
Fall Clean-up

December
Commercial Snow Management

WE DO COMMERCIAL SNOW REMOVAL!

If you or someone you know has a commercial lot in need of snow management, call us with their name and number and we will be happy to help them. Referrals are much appreciated and are treated accordingly.
